Document Management News from August 2006 Issue

Docsvault

Easy Data Access (www.docsvault.com) has introduced a dual scanner and document storage device called Docsvault Professional.

It scans paper documents and can upload them electronically.

It also offers a CD drive to save documents to a separate storage disk.

The machine has built-in PDF creation software and encryption to secure confidential data such as passwords and credit card information, says the company, based in St. Charles, Mo.
