

Construction Business

Construction industry is a challenging and dynamic industry, which poses challenges at all levels of construction project, right from designing the project through to execution.

Unlike manufacturing industry, where factories have to churn out same products in a controlled environment, construction projects are carried out in an unsheltered environment and needs vary according to projects, sites and weather conditions.

Construction business is always unstable and chaotic, making it very important that their back office is running smoothly. To reduce the chaos and bring sanity in this industry, one needs more than a capable manager.

Challenges

Keeping up with changes

Too much chaos

Managing expenses

What are the challenges within construction industry?

Clients of construction businesses want their work to be done on time, in the allocated budget and without slightest of variation. This poses a big challenge to construction business, but it can be eased by proper planning and management.

- **Keeping up with Changes**

Unlike other industries, construction business is highly affected by economical and technological changes. People in construction businesses have to embrace technology to stay abreast of competitors and changes.

- **Too Much Chaos**

Typically, construction businesses have to manage workforce, obtain strategic sites, design profitable projects and execute them expertly keeping competition in mind. To achieve all this, construction businesses need an able manager and strong technological support.

- **Managing Expenses**

Just as in every other industry, it very important for construction business to offer value for money as well as stick to the allocated budget despite escalating prices.

Solution

Incorporating a simple solution that offers technological as well as management support

Think about it...

How good it would be if you didn't have to worry about losing important contracts?

How much better your employees would perform if they didn't have to do mundane jobs?

How much money could you save if you didn't lose documents and spent money on reproducing them?

Document management software can help solve all these problems. This simple technological solution can allow all types of businesses to manage and collaborate efficiently and reduce chaos; construction is no exception. This software also provides immense savings by reducing time and cost of doing backend jobs.

How can Document Management Software help?

Document Management Software provides support for a variety of operations like organizing and securing your data as well as coordinating with your colleagues, so that you can worry less about mundane backend jobs and focus more on other critical issues of business.

Docsvault, our super-efficient Document Management Software can help you do all these and much more.

Docsvault: Super-Efficient Document Management Software

Docsvault is an extremely efficient Document Management Software that can smooth out all document management tasks within construction industry.

Apart from the obvious benefits such as more efficiency in handling documents, Docsvault can also help by making retrieval, collaboration and securing easier. This means there will be less clutter on your desk and you can get information quickly.

Let's see how Docsvault features can ease some of the challenges of construction industry.

Who is using Docsvault?

- Exbon Development, Inc., United States
- Farmers Marine, United States
- ConArt, Inc., United States
- Adtech Systems Inc., Canada
- aristidis benetatos, Greece
- AJ Lucas, Australia

"A good basic, no-fuss, cost effective solution to document management. After a lot of research we found Docsvault stood out from the rest when using this criteria"

- Phil Talintyre (IT Manager)

- **Integrated Scanning**

With Docsvault you don't need a full-time person to take care of your scanning needs. Simply put all the papers you need to scan and Docsvault's multiple scanning feature will do the rest for you. Features like barcode separation to automatic page recognition, Docsvault makes batch scanning a breeze.

- **Advanced Scan Tools**

You can improve the quality of your project designs with the help of PDF assembly tools such as despeckle, deskew, brightness and contrast adjust, crop, erode and dilate. You can also highlight important areas of documents.

- **Document Relations**

When searching for documents, wouldn't it be great if you were able to see related documents too. Docsvault allows you to set relations between all documents pertaining to a particular project, so that you don't have to waste time in searching for related documents stored in different folders.

- **Print to PDF**

PDF is a widely accepted file format and everything from text files to images can be converted to PDFs to reduce manipulation and size. Docsvault comes with an inbuilt PDF printer allowing you to convert all your documents to PDF.

Other benefits

- ✓ Reduces clutter resulting from too many papers and designs
- ✓ Saves cost by reducing the space needed to store records
- ✓ Organizes project information and designs
- ✓ Secures confidential contracts and bids
