Access documents from anywhere using web browsers	-	✓	✓	✓
Available to PC, MAC, Linux and mobile device users	-	✓	✓	✓
Create public link to share any document version with external users	-	✓	✓	✓

	<i>Small Business</i>	<i>Enterprise</i>	<i>Ultimate</i>
<i>O - Optional</i>			
Share files and folders right from Docsvault via email with password-protection, expiration dates and optional download permission			
Get files from anyone using Document Request Links directly in Docsvault. Outside users simply drag and drop files in web browser to send you files.			
Mobile Apps	-	✓	✓
Mobile Apps for iOS and Android smartphones & tablets			
Secure encrypted connection to your DV Server			
Search, create folders, upload new documents captured using your camera, add to favorite, edit notes and description, change document profiles & document status			
Get Notifications of new workflow tasks			
Review and approve workflow task and move then forward			
Take ownership of workflow tasks or delegate tasks with simple taps			
Document Profiling & Indexing (Metadata)			
Create your own custom index fields and profile documents with relevant metadata for different types of documents in your repository	✓	✓	✓
Index fields can be free text input, predefined static lists, dates, numbers, auto incremental, etc.	✓	✓	✓
Allow choice of profiles or enforce consistency by mandating use of specified profile under certain locations	✓	✓	✓
Apply predefined/custom validation rules for checking entered values (ex: zip code, phone#, IDs, currency, percentage, integer, etc.)	✓	✓	✓
Automatically name documents, add description and notes based on index values during import	✓	✓	✓
Auto populate dynamic index values such as users/groups, date, day, time, etc.	✓	✓	✓
Set indexes to inherit values automatically from their parent folder	✓	✓	✓
Set auto relation between documents on the basis of same index values	-	✓	✓
Auto document filing based on entered index values	-	✓	✓
Records Retention	-	✓	✓
Create multiple retention policies for different documents			
Manage both physical records & digital files in one system			
Manage circulation of physical records			
Auto retention can be applied based on document profile and date index field in them & also based on the document's created date in the system			
Manually apply retention to large number of documents in one go			
Full audit trail and traceability for compliance			
Security and Administration			
Fine Grained Access Control (Users and Groups)	✓	✓	✓
System Level Rights For Different System Activities	✓	✓	✓
Prevent users from exporting Documents out of the system	✓	✓	✓
User Based and Folder Based Ownership Overrides	✓	✓	✓
Active Directory Integration for user authentication	✓	✓	✓
Disable user logins after n number of failed login attempts for security	✓	✓	✓
Reports & Charts (view and export in different file formats)	-	✓	✓
Maintain parallel repository in simple windows folders	-	✓	✓
Importing Static Index values from predefined csv or xml file list	✓	✓	✓
Export repository with metadata in various formats	-	✓	✓
Export Document Profile values as csv, xls, xml, etc	-	✓	✓

	<i>Small Business</i>	<i>Enterprise</i>	<i>Ultimate</i>
<i>O - Optional</i>			
Scanning and Capture			
Built-in Advanced Scanning Tools	✓	✓	✓
Document Assembly Before Imports (split, merge, rescan, drag & drop pages, etc.)	✓	✓	✓
Multiple Scan Profiles To Accomplish Different Scan Jobs	✓	✓	✓
Scan from any TWAIN compliant scanner or any folder	✓	✓	✓
Rubber Band OCR for quick profiling	✓	✓	✓
Automatic Document Separation (Barcode, Blank Page, etc.)	✓	✓	✓
Watch Folders or Hot Folders for auto imports from specified location	✓	✓	✓
Save documents as PDF Files from any application)	✓	✓	✓
Profile based Auto Filing of scanned documents	-	✓	✓
Search and Retrieval			
Comprehensive Search (Simple and Advanced)	✓	✓	✓
Full-text Indexing For Searching Within File Contents	✓	✓	✓
Saved Searches (Public and Private)	✓	✓	✓
Refine Searches To Narrow Down Search Result	✓	✓	✓
Export Search result in different file formats	✓	✓	✓
Smart Search: Access Docsvault files/folders from any 3rd party application using simple 'hotkey' creating virtual integration	-	✓	✓
PDF Manipulation			
Integrated PDF Manipulation (PDF Editor)	✓	✓	✓
Correct PDFs with features like redact, erase, edge cleanup, straighten crooked pages, adjust clarity and much more (PDF Correction Tools)	✓	✓	✓
Assemble PDFs (Append, Reorder, Split, Crop, Extract, etc.)	✓	✓	✓
Merge multiple PDFs to create a new file	✓	✓	✓
Annotate PDFs (Highlight, Notes, Draw, Type, etc.)	✓	✓	✓
Edit PDFs (Change, Move or Delete Text & Images)	✓	✓	✓
Add watermarks, bates numbering, barcode and e-signature. Import & export comments & retrieve Adobe Acrobat Forms data	✓	✓	✓
Scan and append new pages to any PDF	✓	✓	✓
Convert text & image based files (Word, Excel, & Images) to PDFs	✓	✓	✓
Audit & Notification			
Folder and File Activity Monitoring	✓	✓	✓
Advanced Audit Trail (logs all activities along with from - to information on events)	-	✓	✓
Set instant or periodic Email Alerts for document events for yourself or your team	✓	✓	✓
Query for all activities by any user or under specified location	✓	✓	✓
Export reports in different file formats	✓	✓	✓
Document Tasks			
Route document and assign task to other users	✓	✓	✓
Allot or forward task to individual or a group	✓	✓	✓
Notifications and schedule reminders via email and/or popup alerts	✓	✓	✓
Review the entire tasks workflow (history of task)	✓	✓	✓
Add task-related notes	✓	✓	✓
Assign Personal task and reminders	✓	✓	✓
Export Task lists in different file formats	✓	✓	✓
Access entire Task Manager using web browser	-	✓	✓
Automated Electronic Workflows	-	✓	✓
Build workflow logic graphically to automate business processes without coding			
Route workflow automatically to dynamic or predefined users			

	<i>Small Business</i>	<i>Enterprise</i>	<i>Ultimate</i>
<i>O - Optional</i>			
Prompt workflow users for any mandatory information or enter comments before moving the workflow further			
Export workflow documents and their profile metadata automatically to a predefined location			
Get email alerts for Workflow events and exceptions for prompt action and supervision			
Full workflow events logging and traceability			
Digitally sign Word, Excel & PDF documents as part of a workflow			
Manage revision and audits of QMS documents			
Reports for users and workflow managers to monitor daily task performance, actions performed by all participants, overall workflow performance, etc.			
Email Reminder Jobs	-	✓	✓
Set automated email jobs to send out personalized emails to yourself or customers as a reminder for time sensitive documents			
Reminders can be consolidated in one email if sent to a single recipient avoiding separate individual emails for all qualified documents			
OCR Add-On	O	O	✓
Optical Character Recognition			
Scan and Create Searchable PDF Files			
Create Searchable PDF files from Imported PDFs			
Administrative Reporting & Control Options for OCR Process			
OCR Legacy TIFF Files and Convert Them to Searchable PDFs			
Advanced Capture Add-On	x	O	O
Capture values from scanned documents using Barcodes and Zone OCR			
Automatically name documents and set filing rules based on captured index values			
Advanced Profiles Add-On	x	O	✓
Use Data in External Applications Like CRM, Accounting, ERP, etc. to Fill Up Profile Values In Docsvault			
Auto Fill Dependent Index Values Using Custom Queries To External Databases			
Create Conditional Value Lists Depending On Values Chosen For Previous Indexes			
Barcode Reader Add-on	x	O	✓
Reads barcodes on documents for indexing and naming them. Can break down multi-valued barcodes with delimiters and map them with document profile indexes or auto naming			
Advanced Import Add-On	x	O	✓
Use index values in CSV files to automatically name documents, profile them and file them in the right location using filing rules. CSV with ANSI, UTF-8 & UTF-16 encoding are supported.			
Extract metadata from email files (.eml & .msg format) and map it to index field within Docsvault.			
API Add-On	x	O	✓
Integrate with any programmable business application using Docsvault's REST based APIs			
Email Automation Add-on	x	O	✓
Email Capture: Capture desired emails from any email server using capture rules			
Email Archive: Store, organize and track email communications and attachments for compliance			

	<i>Small Business</i>	<i>Enterprise</i>	<i>Ultimate</i>
<i>O - Optional</i>			
Digital Signature	X	O	✓
Sign Word, Excel, Text, Tiff files and converts them to digitally signed PDFs from desktop & web interface			
Prevent tampering of documents by automatically invalidating signatures if contents are altered			
Set further restrictions allowing or disallowing others to make various changes			
Get approval signatures from multiple people to complete a document workflow electronically			
Collect in person signatures from non Docsvault users in web interface			
Request signatures from partners and customers (non-Docsvault users)			
Signers can easily sign documents from anywhere and from any device using a simple web browser			
Signatures can be requested for multiple documents and from multiple people in sequence in one go			
Requesters can be notified of the progress with automated emails or they can monitor the progress of each request from within Docsvault			
Web eForms Add-on	X	O	✓
Simple Drag and Drop HTML Form Builder with custom themes			
Simple arithmetic calculation using numeric & date fields			
Formula Table control for simple expense reports, orders & other tables with formulas			
Use Docsvault profile index field onto your eForms			
Create Field Rules to show/hide fields and set values based on the selection/values of other fields			
Create dynamic Word, Excel and PDF documents from templates based on captured data			
Captured data can be used to index the document created, name it dynamically and automatically select its filing location			
Keep an accurate log of data captured & Analyze captured data using various criteria			
Trigger automatic workflows on form submissions			
Set access security & alert appropriate users on form submissions			
Create customized reports based on form submission entries			
Analytics Tools Add-on	X	O	✓
Comprehensive User/Group Access/Security Audit Module			
Dynamic Folder Usage Report			
Tools to find Duplicate Files in your repository			
Interface and Usability			
Open Multiple Locations in Different Tabs	✓	✓	✓
Details View With Sorting and Filters	✓	✓	✓
Customizable Columns (Display Document Index Values)	✓	✓	✓
Thumbnail View With Variable Thumbnail Sizes	✓	✓	✓
Per Folder / Per User View Settings	✓	✓	✓
Drag & Drop / Copy & Paste Simplicity	✓	✓	✓
Customizable Folder Icons (Choose From a List or Import Your Own)	✓	✓	✓
Windows Explorer Like Simple Interface	✓	✓	✓
Email any document version instantly with Docsvault Quick Email	✓	✓	✓
Export file lists in xml, csv, xls, xlsx, and pdf format	✓	✓	✓
Search option in Navigation Dialog to quickly locate the folder	✓	✓	✓
My Workspace work corner to quickly access user specific	✓	✓	✓

	<i>Small Business</i>	<i>Enterprise</i>	<i>Ultimate</i>
<i>O - Optional</i>			
Task Calendar to keep track of active and overdue workflow, personal and assigned tasks.	✓	✓	✓
Centralized Management of User Settings	-	✓	✓
Technical			
Automated Full and Incremental Backups (<i>if SQL server is installed by Docsvault</i>)	✓	✓	✓
Broadcasting and Server side event Alerts	✓	✓	✓
Server-side Management Tools	✓	✓	✓
Service Availability Monitoring	✓	✓	✓
Database: Microsoft SQL Server 2008 or above with full text indexing and filestream support. (<i>The free SQL 20014 edition is included by default</i>)	✓	✓	✓
IIS Server: 7.x or higher with asp.net support	✓	✓	✓
