What it means for you?

Document Previewer is a very important feature because it literally adds meaning to the new-age document management software that allows you to view your content without limitations of installing native software for different file formats. Now you are not restricted because you don't have too many applications on your desktop or laptop. You can view over 100 file formats for documents, emails, images etc. without having to leave Docsvault.

Document Preview

Fast facts

- No external dependency – you do not need to install anything to be able to view any of the supported formats
- The Document Preview feature respects Docsvault securities
- This feature is included in the Docsvault Enterprise Edition and is not a separate add-on
