Web Scan Plugin for Internet Explorer

Remote scanning is made easy with **Docsvault's WebScan ActiveX plugin** for Internet Explorer browsers. The **WebScan** plugin allows remote users to scan documents using Internet Explorer from a local scanner connected to their PCs without having to install the Docsvault Desktop Client software.

Highlights

- ✓ Convert all your paper documents to digital files without installing a full Docsvault desktop client
- ✓ All files are thoroughly indexed and searchable
- ✓ Offers cleanup tools like Redact, Despeckle, Erase, Deskew, Dilate, Erode, Highlight, Zoom In/Out, Page navigation, Rotate, Remove punch hole, etc.
- ✓ Use your TWAIN based scanner's features like skip blank pages, auto deskew and duplex scanning if supported
- ✓ Allows multiple page scanning in a single file
- ✓ Compatible with IE 9 and above with ActiveX control enabled
- ✓ Secure transfer using HTTPS (secure socket layer)

What it means for you?

You can not only scan your files from your desktop but any computer even if no scanning software is installed on it. This is especially useful if your company is spread over multiple locations and requires remote working. Web scanning allows your users to login to the main Docsvault Web Client from anywhere and scan documents to multi page PDF or TIFF files. Docsvault even performs OCR on scanned files so you can easily search for scanned text later on. Scan files directly to the company repository rather than email or ftp files saving you time and enforcing consistency.

Solutions

Quick Scan
Scan files from anywhere, anytime

Paperless Office
Convert all your files to digital documents and make way for a paperless office
