Connect Remote Offices

Thanks to the ever improving internet infrastructure, establishing connectivity between remote offices is easier and more reliable than ever. Docsvault has complete set of connectivity options allowing you to access your central data from your remote offices either through VPN, web access and/or mobile devices.

Highlights

- ✓ Connect remote offices and allow remote users to participate in the document creation and sharing
- ✓ Secure all your documents in your main office and yet share them with geographically distributed users
- ✓ Manage documents with remote users without having to rely on e-mail or other sharing platforms
- ✓ Help geographically-dispersed teams collaborate with each other
- ✓ Stop shipping documents between main and remote offices

What it means for you?

When you want to run a successful business, communication and collaboration is the key. Docsvault allows you to connect all your offices around the world. Connectivity with remote offices means you don't have to worry about spending money on shipping paper documents or e-mailing electronic documents, while waiting for the person at the other end to respond. This not only helps you share and collaborate better but ultimately offers you maximum employee productivity no matter what corner of the world they are in.
